Kashfa Muskan

DevOps Engineer

kashfamuskan329@gmail.com | Karachi, Sindh (Remote)
linkedin.com/in/kashfa-m-868908238 | github.com/KashfaMuskan329

OBJECTIVE

Dedicated DevOps and Cloud Engineer with hands-on expertise in AWS, Microsoft Azure, Linux, Networking, and Containerization. Contributed at Softex Solution — managing and securing infrastructure for two flagship products (Softex HRM and Softex Frontend), automating CI/CD pipelines, and conducting performance and security testing for production systems.

EXPERIENCE

DevOps Engineer *May 2026 – August 2026*

Softex Solution · Internship · Remote

- Owned infrastructure, deployments, and monitoring for two production projects — Softex HRM and Softex Frontend — running on a Hetzner Cloud (Ubuntu) server.
- Migrated Softex HRM's production domain (hrm.softexsolution.com → synkrox.com), reconfiguring Nginx, SSL/Certbot, Redis, and Docker containers with no data loss.
- Built a 5-service staging CI/CD pipeline for a Next.js + Django application from scratch, resolving cross-stack dependency and environment issues along the way.
- Re-architected the Softex Frontend CI/CD pipeline, isolating staging from production via dedicated Docker containers and branch-aware GitHub Actions workflows.
- Performed security audits on Softex HRM and Softex Frontend, identifying 30+ vulnerabilities — including exposed credentials and broken access-control logic — and drove fixes with the dev team.
- Load tested infrastructure for 2,000 concurrent users using Apache JMeter and implemented a caching strategy across 4 production applications.
- Designed a custom real-time server monitoring dashboard (Netdata, Portainer, Docker) plus an automated container-alerting system emailing the team within seconds of any outage or recovery.
- Ran full server health audits (CPU, RAM, disk, services, logs, backups), hardened SSH access with Fail2ban, and authored infrastructure and migration-strategy documentation.

DevOps Intern *Apr 2026 – May 2026*

CodeAlpha · Internship · Remote

- Built automated CI/CD pipelines on Azure and set up Jenkins Remoting for secure distributed builds.
- Deployed containerized web servers with Docker, improving scalability and deployment consistency.

Facebook Ads Expert *2022*

Catchafire · Remote, Project-Based

- Managed campaigns, optimized performance, and analyzed ad metrics for better ROI.

SKILLS

Cloud AWS (EC2, S3, IAM, VPC, Auto Scaling, ELB, EBS, CloudWatch) | Microsoft Azure (Compute, Storage, VNet, IAM, Monitoring)

Infrastructure Hetzner Cloud | Linux (Ubuntu, CentOS) | Bash Scripting | SSH | Nginx | Reverse Proxy & SSL (Certbot)

CI/CD GitHub Actions | Jenkins | Azure DevOps | CI/CD fundamentals

Containers Docker | Docker Compose | Kubernetes (hands-on labs)

Monitoring & Security Apache JMeter | CloudWatch | Netdata | Portainer | Fail2ban | Security Auditing

Networking TCP/IP | DNS | DHCP | Subnetting | Routing & Switching

Other Git | GitHub | VS Code | Web Development

EDUCATION

Bachelor of Computer Science 2023

Virtual University of Pakistan

CERTIFICATIONS

Cisco Networking Certificate | Docker Essentials | Linux Fundamentals
